

ECO Tips for Spring:

1. Have guests at your parties mark their disposable cups with a permanent marker, so everyone only needs one.
2. Use an electric starter or a charcoal chimney rather than lighter fluid for your BBQ to reduce air pollution.
3. Washing your car at a professional car wash saves on water consumption.
4. Water your garden in the early morning to reduce evaporation and save water. Early watering also reduces mildew.
5. Patronize our summer farmers' markets for fresh, locally grown produce to reduce your food's "carbon footprint".
6. Take advantage of our lovely spring weather to walk when possible if your destination is less than a mile away. Try using your bike for trips of less than 3 miles.
